

## New Features in Slate

### Holds warning

1. A daily check is performed as soon as the Net ID is verified to see if the student has any holds. In the past, we did not learn of the holds until the admit was placed and it was mostly the student's responsibility to take care of the hold. Now in Slate, the applicant can see the **Hold** message and what office to contact while they are still applying.

#### Net ID verification:

Applicants are required to enter their Net ID into the application. Five times a day a process runs to verify that Net ID is valid and matches the applicant name (in Person / AIM). They cannot submit until the Net ID is verified. Grad Studies student employees research the issues and email the applicants, reporting mismatches in how their name is listed in Person (AIM) or what error is found.

#### Endorsement

The Endorsement status runs a check each night and shows up as “awaiting” or “received” on each student checklist. Once a week submitted applicants missing endorsements are sent an email reminder. For applicants who indicate they are non-members, a more informative and instructive email will be sent also.
