

“Never again”

A phrase we used after WWII when 6 million Jews were murdered.

“Never again”

We said after the Rwandan Genocide where 800,000 Tutsis were murdered.

“Never again”

We used once more after the Srebrenica genocide when 8,000 Muslim men and boys were killed.

“Never again”

We say as we hear Palestinian children and families are dying.

“Never again”

We use while forgetting about the conflict in Ukraine and Russia.

When will “never again” be the truth? When will we mean it?

I use my education at BYU and my light as a disciple of Christ to spread the message of peace in a world full of darkness. During my graduate program I am focusing on research, the purpose is to benefit the world. Research that proves to the world that peace is possible. That as we change one by one, we change as a society. As we serve one on one, we make the changes that the world needs. As the needs of the world are met, we mean what we say when we say, “Never again.”
